

Flue gas measurement truly smart.

The new testo 300 flue gas analyzer with smart-touch technology.

Truly expedient: The advantages.

Operation via smart-touch

The smart-touch display responds immediately without any delay. That allows intuitive operation – just as easy as on your smartphone.

E-mailing of reports

The testo $\bar{3}00$ enables the convenient creation of documentation directly on site. You can send reports to the office or customers straight away via WLAN.

Keep an eye on all the measuring values

You can see all the system's parameters straight away on the large 5" HD display.

Get the result faster

Clearly structured menus for all relevant measurements are already stored in the measuring instrument and guide you efficiently through the application.

Ready to use straight away

No more waiting time. In standby mode, the testo 300 is ready to measure at the touch of a button.

Completely worry-free

The testo 300 has quality sensor technology with up to 6 years' service life, measures high CO values up to 30,000 ppm and is future-proofed thanks to NO preparation.

Truly robust:

The construction.

Smart measuring technology is of little benefit if it does not keep going in tough day-to-day working conditions. Because your measuring instrument is a partner that supports you every day in the efficient, problem-free performance of your tasks. This is precisely why the testo 300 has a particularly resilient and high-quality construction. Special challenges can thus easily be met across workshops, transport vehicles and boiler rooms.

Protected display

Scratch-resistant, recessed and with a special replaceable protective film.

Secure mounting

4 strong magnets with rubber coating – particularly material friendly.

Bolted housing

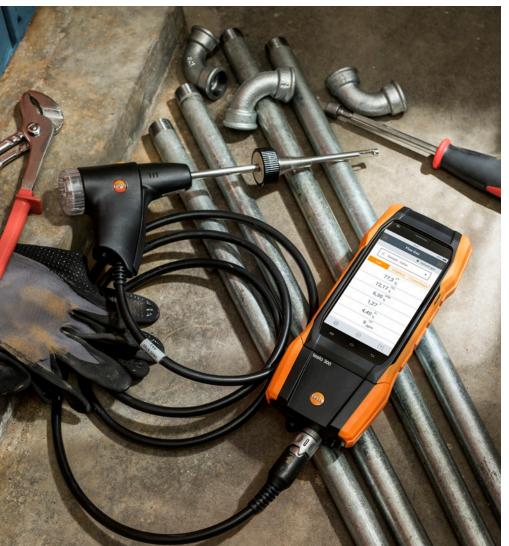

For that extra degree of stability when it really matters.

Robust sensors

Optional: extremely durable O₂ sensor and automatic dilution up to 30,000 ppm CO.

Truly flexible:

Instrument configuration and probe system.

A flue gas analyzer perfectly tailored to your needs

The testo 300 doesn't just give you smart operation – the configuration also has that certain something. This means you can choose between a 2-year and 4-year warranty for the sensor technology. In addition to $\rm O_2$ and CO, you can also add a third sensor slot for the measurement of $\rm NO_X$ as an option. And various kits with special instrument configurations and individual accessories are available, specifically tailored to the requirements of heating engineers and chimney sweeps.

Versatile probes - quickly changed

One handle for a variety of probes

A variety of probe shafts can easily be attached to the multi-functional handle. This ensures you enjoy a high level of flexibility in all applications. And you are ready to measure even more quickly, thanks to connection via a universal plug.

Proven probes

You can use the testo 320, testo 330 and testo 330-1/-2 LL probes with their practical multiple plug for the testo 300 as well.

New probes

New probes with anti-rotation USB C connection are available for temperature measurement, for example of flow and return temperatures, along with ambient CO measurement.

testo interface function

The testo 300 provides an interface with a variety of industry software. This enables you to access the testo 300's readings with your terminal devices and tools and to document them or further process them in your industry software.

Truly intuitive: The menus.

Customers/measuring points

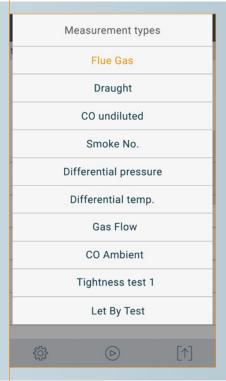

Integrated address book with details of the relevant heating system (e.g. manufacturer, system type, system name, serial no., fuel, etc.).

Professional documentation

Create measurement protocols with all the information about readings, customers and heating systems directly on site, add comments to them, have the protocols confirmed by the customer's signature and send the protocols. You can also store your company logo. All PDF reports with all the important information are also saved in the instrument so that they are always to hand.

Intuitive measurement menus

Clearly structured and explicit menus for all applications involving heating systems are already stored in the testo 300. This allows you to do your jobs even more efficiently.

General technical data			
Certification	The testo 300 is TÜV-te EN 50379, Parts 1-3	ested according to 1st German Federal Immission	Control Ordinance (BImSchV)
Storage temperature	-20 to +50°C		
Operating temperature	-5 to +45°C		
Charging temperature	0 to +45°C		
Humidity application range	15 to 90% RH, not con	densing	
Power supply	Rechargeable battery,	USB mains unit	
Rechargeable battery life	10 hrs		
Protection class	IP 40		
Memory	1 mio. measurement values		
Display	5.0" touch display, HD 1280x720 pixels, IPS (160 k)		
Weight	Approx. 800 g		
Dimensions	L: 244 mm (including probe connection) H: 59 mm W: 98 mm
