

DI Water Tank

For pressurized water delivery
for Fuel Cell Test Systems

Does your lab lack a source of pressurized water? We have the perfect low-cost solution for you.

Our DI Water Tank provides pressurized delivery of an existing DI water source. Pressurized DI water delivery is required for Auto Water Fill function of Humidifiers.

DI Water Tank features

- Cost-effective solution for pressurized water delivery
- Compatible with Scribner 740 / 840 / 850 / 855 Test Systems
- Uses existing purge gas supply
- Tank regulator, pressure gauge & over-pressure safety relief valve
- Large capacity 19 L (5 gal) means infrequent filling
- All-stainless steel construction
- Easy installation and operation
- Large opening for easy filling
- Inert gas blanket preserves water purity
